CARLOTTA DE BEVILACQUA

—

Architect, designer and above all humanist, Carlotta de Bevilacqua has been a force in contemporary lighting since the 1980's. A pioneer in LED research and implementation, she created the concept "The Human Light" in which lighting encourages not only the well-being of those who live, work and interact with it, but also the planet.

As interested in science of light as the sensory experience, de Bevilacqua seeks to create synergy between products and users through accessible, experimental design. A life-force at Artemide for nearly 4 decades, in addition to her own studio she oversees Danese Milano creating minimal, yet elegant, products which further complement the built environment.

In addition to widespread recognition for her work, in 2011, she received a Red Dot Design Award for the Algoritmo and Copernico.

TECHNOLOGY

Invero lighting device is a well-calibrated combination of optical, mechanical, and thermal principles, making it a highly technological piece. At the crossroad of tradition and technology, Invero is the result of ancient glass blowing techniques combined with the latest LED technology.

UNIQUE

Invero is uniquely crafted of hand blown glass combined with a highly technological lighting device. The beauty of imperfection is uncovered through a reinterpretation of hand blown glass. Invero refers to the classic form of a Veronese vase, typical of the Venetian glass production.
