

IPPOLITO

BY
ALESSANDRO PEDRETTI

ALESSANDRO PEDRETTI

A Milanese architect, designer and museum exhibition consultant, Pedretti has worked with Studio Rota since 1998. Equally interested in art, fashion and cinema he designed a "Star Wars" themed exhibit for Milan's Triennale in 2005.

DECO

Although minimalistic, Ippolito has a decorative valence. Its contemporary full-bodied shape adds a touch of personality, filling any modern exterior with a soft, playful light.

TECHNOLOGY

Ippolito features direct emission from high performance LED modules. While enhancing exteriors with its shape and charming ambient light, the fixture's LED technology ensures environmental friendly lighting and durability.

AMBIANCE

Ippolito uses its distinct shape to allow its direct light to bounce off its curves, creating a full notion of warm, ambient lighting.
