

ISLET

BY
MIKKO LAAKKONEN

MIKKO LAAKKONEN

Trained as a musical instrument-maker Finnish designer Mikko Laakkonen was Reddot's Furniture Designer of the Year for 2014. Well known for his use of wood, he incorporates a perspective from nature and sideways perspective into objects for everyday use.

MINIMALISM

Simple in its shape and design, Islet projects a warm aura thanks to indirect/direct light emission against the wall. It is an elegant accent piece that intrigues the eye thanks to a playful pattern of cutouts that let the light escape in a artful way.

VERSATILITY

Whether installed horizontally or vertically, Islet makes an interesting addition to any interior, whether residential, hospitality or contract. Also suitable for damp locations, Islet is a perfect fit for bathrooms application.
