Mario Botta

↪ 1986

Mario Botta was born in 1943 in Mendrisio, Switzerland. In his work he took inspiration from such masters as Le Corbusier, Louis I. Kahn, and Carlo Scarpa, whom he met during his studies in Venice. Architecture and memory are inseparable in his work, where the changes implemented in architecture become part of man's landscape. Light generates space, primary geometric forms are distinctive signs left by man in his surroundings. Since his early detached houses in Canton Tessin, his work encompassed all building types (schools, banks, administration buildings, libraries, museums, and religious buildings), as well as design.

## ↗ Icon

Part of the Artemide masterpieces collection, Shogun is featured in the collections of museums like the Metropolitan Museum of Art in New York. Originally released in 1986, Shogun has been updated to incorporate modern LED technology and is a stunning work of contemporary design.

## ↗ Graphic

With its bold black and white stripes, Shogun creates a strong graphic presence with its contrast. Its diffuser is crafted of perforated steel, which diffuses a soft light through the tiny holes creating an interesting pattern of light and shadow.

## ↗ Adjustable

Shogun's eye-catching design is also highly functional. It features an innovative steel shade that can be adjusted to direct light where it is desired.
