

# SPACE CLOUD

BY  
ROSS LOVEGROVE

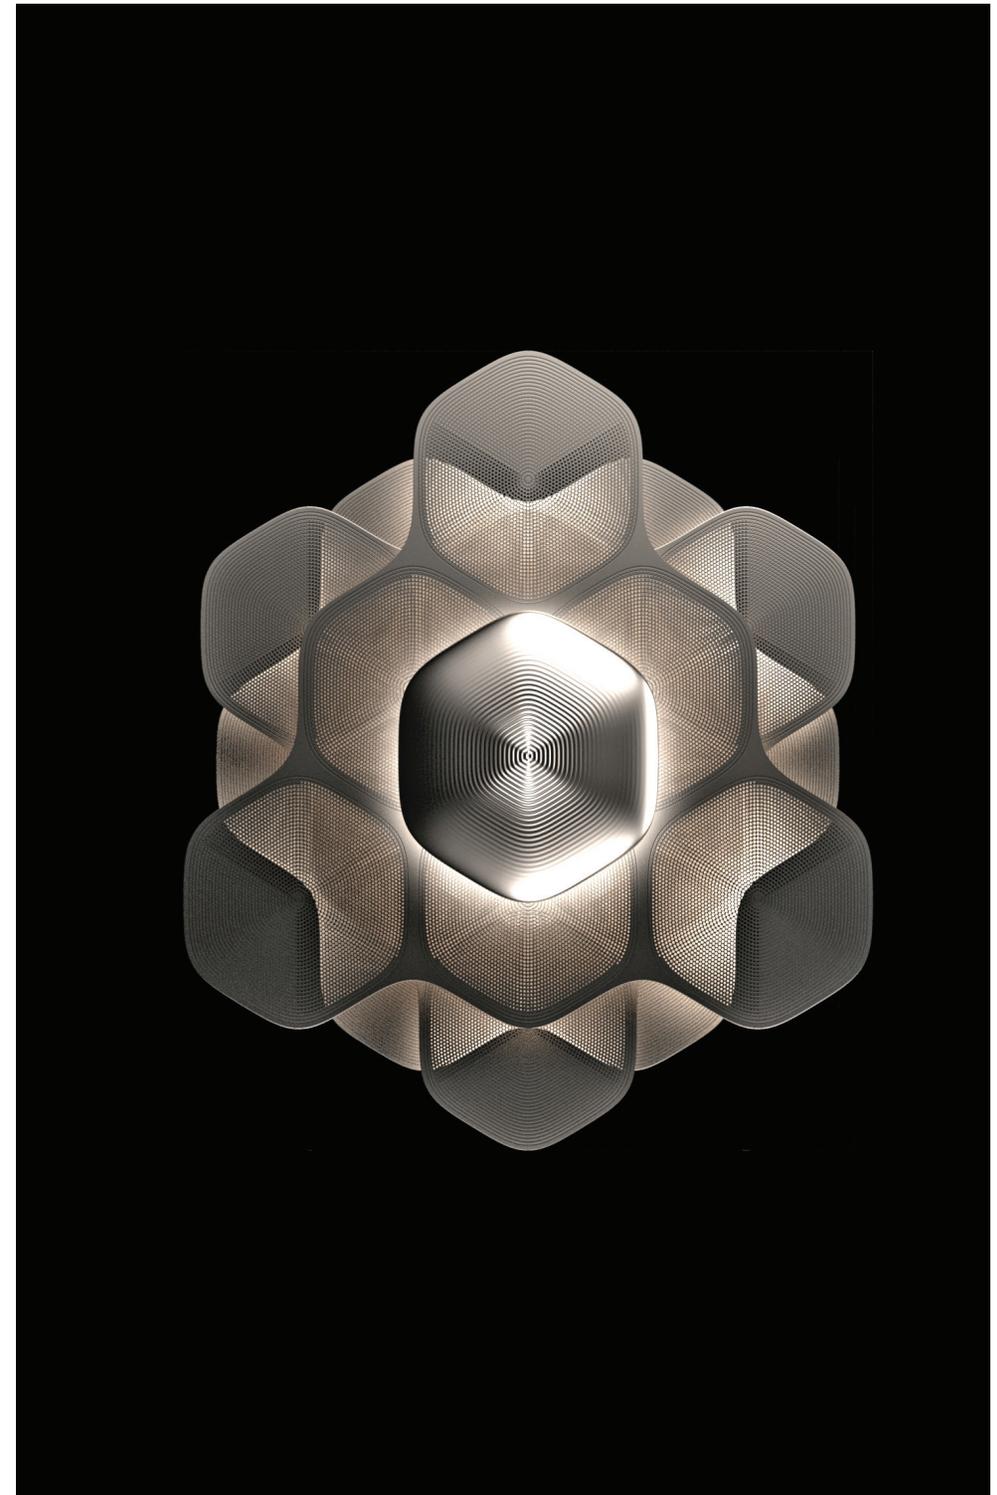

**ROSS LOVEGROVE**

---

Born in Wales in 1958, Ross Lovegrove is a visionary industrial designer for whom the inherent logic and beauty of nature are paramount to any man-made object. Having designed everything from modes of transportation to furniture to human-scale electronic devices, minimal organic beauty underlies every concept.

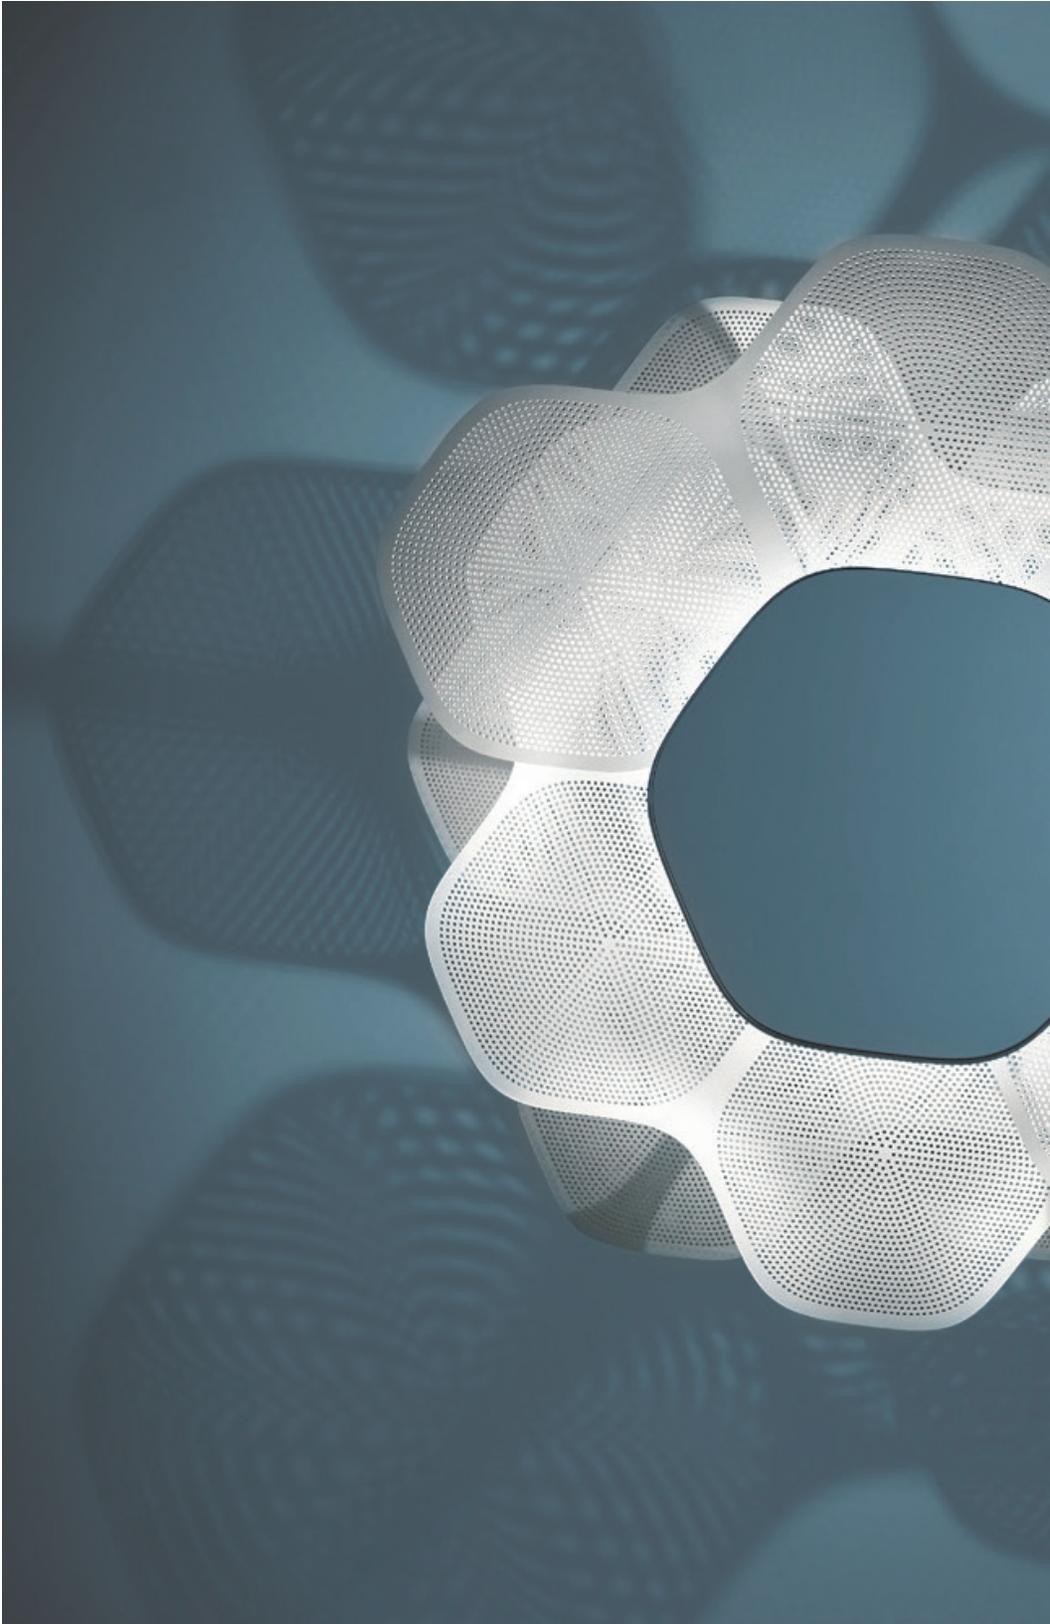

Widely published and award-winning, Lovegrove creates beauty through the marriage of biology and object. His TED talks on the topic of "Fat-Free" organic design have been viewed over 4 million times.

## UNIQUE

Space Cloud's concept has been inspired by NASA's photos from space of the Earth and the incredible quality of light one perceives as the color of the Earth itself influences with warmth and crystal clarity of the sun's rays.

## TECHNOLOGY

---

Space Cloud is made of 100% anodized aluminum, making it lightweight and ensuring that the color/surface treatment becomes an integral part of its physicality as in Space technology. Its high-performance LED COB projects light through four aluminum elements, creating unique patterns of light and shadow on the ceiling.

## MODULAR

---

Space Cloud is a highly modular suspension lighting system with a great potential for creating large density installations. It can be configured in vertical or horizontal layers as light capturing surfaces that allow light to both reflect and be absorbed through each sheets spatially designed hexagonal hole matrix.

# SPACE CLOUD suspension

## EMISSION

indirect and diffused

## LIGHT SOURCE

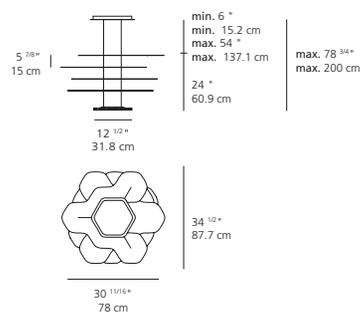

LED

41W 3000K >93CRI

## DIMMING FEATURE

dimmable

## DIMENSIONS

available with extended length

## FINISH

■ grey
