Having created multiple award-winning products for companies all over the world, Poulton lives and works in Paris where he continues to focus on simple, mass-produced objects of practical use.
MINIMALISM

A signature design by Neil Poulton, Surf’s sleek curvature effortlessly blends into any interior space, whether residential or commercial. Adding a touch of modern elegance, Surf system provides a relevant general lighting solution to offices, schools, corridors, ...
Surf system components are easily interchangeable creating both suspension and wall fixtures. This cohesive visual language is ideal for architectural projects requiring multiple typologies.
MODULAR

Thanks to a wide selection of connectors, multiple configurations can be imagined by architects, designers and customers to create unique interiors and bring lighting where it is needed.
